Novaco NB+

Web navigation portal

Select, buy and maintain charts and publications – online.

An ideal platform for the bridge or management office

- Ordering of charts and publications via the web.
- Optimised route planning.
- Support for digital and paper delivery services.
- Download digital updates.
- Financial control – accessible onboard and ashore.
- Use with NovacoHub to provide robust online solutions onboard – with access to data even in comms black spots.

Complete control of vessel navigation

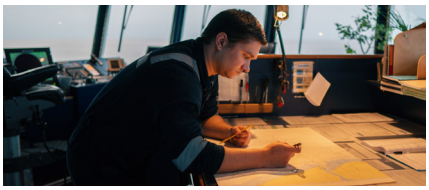
Novaco NB+ is a web-based portal that provides vessels' officers and onshore teams access to comprehensive chart and publication management tools.

It's an internet-based alternative to NovacoBridge, providing access to many of its time and cost-saving features in one place: the cloud. Simply log into the NB+ website to start managing your digital or paper navigational requirements, access updates or plot routes over real ENC data.

Plot, import and export routes with NB+

NB+ gives you the functionality to plot way points for a voyage, or import ECDIS and other compatible route files. Navigation officers can quickly determine the charts and/or publications required for a voyage, or shore-based teams can use the platform to accept, modify or reject orders submitted by their vessels.

Routes plotted within NB+ can be exported and shared with other users. This can save time for onshore teams managing multiple vessels that operate on common routes.



Full navigation functionality

With NB+ you can manage and automate the selection, purchase and updates of both paper and digital charts and publications. NB+ optimises the basket selection for each point on the route – maximising coverage and minimising chart requirements. Updates are accessible as they are issued.

Financial control

Unlock cells and publications on demand and only pay for exactly what you need with Novaco's Instant Permit Service (IPS).

Provide purchase control to each vessel, or allow onshore teams to plan and order on behalf of a vessel in real time. NB+ provides full visibility of orders and expenditure down to vessel level.

- **Supports digital and paper charts and publications.**
- **Support for ADMIRALTY (AVCS, AIO, ADP and AeNP), IMO and other third-party eBook publishers.**
- **Display of AVCS, ADP & AeNP, and ADMIRALTY paper charts and publication holdings graphically on a map, colour coded according to status.**
