ChartViewer

ENC Charts on a PC

The simple way to display tracking information, NavWarnings, T&Ps, passage plans and ENC charts for navigation

ChartViewer brings an ECDIS chart and navigation experience to a PC – plus so much more

- Provides full ECDIS functionality from a PC, laptop or tablet – on or away from the bridge.
- Integrates with NovacoPlan to show passage plan routes on your ENCs.
- Works with NovacoHub to display vessel tracking on your ENCs.
- Enables geo referenced T&P and NavWarning overlays.
- Full AIS/GPS integration option.

ECDIS functionality on a computer

ChartViewer emulates full ECDIS functionality on a compatible PC, laptop or tablet.

Ships' officers can view their licenced electronic charts on the device, independent of the ECDIS.

It makes a perfect back-up in case of ECDIS failure.

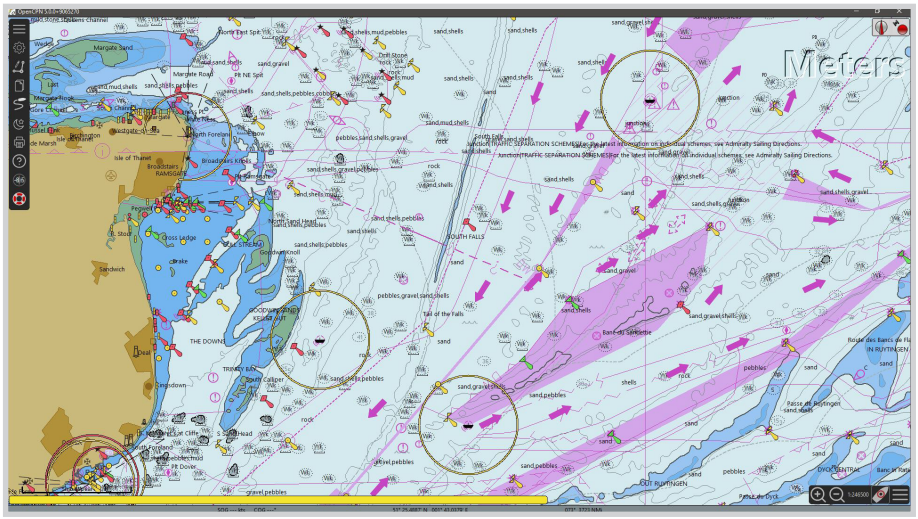
Similarly, battery-powered devices such as laptops and tablets can become an emergency ECDIS if power on the bridge fails.

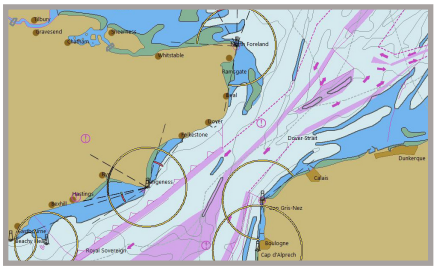
Passage planning

Full integration with NovacoPlan (also included with NovacoBridge)allows the display of planned routes, waypoints, relevant T&P warnings, NavArea warnings and any notes.

Monitor your vessel's passage plan on your ENCs in real time – from any location on the ship.

It is also a flexible tool to support navigation on any vessel, particularly those that use paper charts.





Tracking with NovacoHub

Chart Viewer connects with NovacoHub to display the location of your and surrounding vessels, overlayed onto your available ENCs.

View historical movements of your vessel and surrounding vessels – with up to one-year history.

ChartViewer is supplied as part of a full NovacoBridge installation. It will also work as a standalone product.

- **A simple way to view ENCs anywhere on the vessel.**
- **See overlayed information on your ENCs that is not possible on ECDIS.**
- **Monitor and view route information available from NovacoPlan.**
- **See geo referenced T&P and NavWarning overlays.**
- **Monitor the vessels' position on your ENCs when using NovacoHub or vessel AIS data.**
