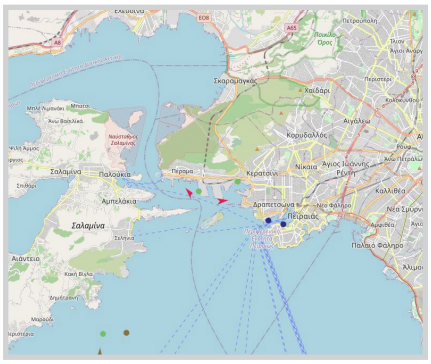
NovacoHub

The clever little box™

NovacoHub is the latest data navigation and tracking innovation from Novaco Navigation – for secure, safe and compliant voyages.

Navigate. Track. Relax.

- Secure direct access to AVCS and AIO for your ECDIS.
- Direct access to ADP & AeNP base files and updates for eReaders.
- Eliminates use of DVD or USBs.
- Weekly updates for paper & digital charts and publications.
- Support for NovacoPAYS delivery of AVCS.
- Tracking of your vessel and nearby vessels, real time 24/7.
- Independent of ship's instruments.
- Free fleet tracking for officers ashore.



Navigation data and tracking – all in one box

NovacoHub delivers and integrates secure navigation data to the bridge, while also providing real-time tracking and vessel positioning information. It's a cost-effective tool for commercial and leisure vessels, available from a smart box that can be installed and self-configured in minutes.

NovacoHub can function as a standalone technology, but also integrates seamlessly with NovacoBridge for a complete navigation and fleet tracking solution.

Secure navigation data delivery

NovacoHub is secure, removing the security risk of DVDs and USB sticks. It connects directly to your ECDIS, PC or laptop, and eliminates missing updates, non-sequential updates, or missing base files for charts and publications. It also gives you access to the latest NtM information if you maintain paper charts or publications.

NovacoHub delivers:

- AVCS, ADP & AeNP files, direct to your ECDIS or PC eReaders.
- Digital publications for eReaders
- NavArea warnings on demand.
- All available updates for ENCs and ebooks.

Pay As You Sail option

Use NovacoHub in conjunction with our NovacoPAYS service and pay only for the charts that fall "under the keel", and not for unnecessary cells often selected from a wide corridor.

Vessel and fleet tracking

NovacoHub provides free tracking information for the crew and management team ashore – completely independent of the vessel's existing bridge equipment. NovacoHub accurately reports the vessel's position, course, speed and more – and can do the same for vessels operating in the vicinity of the host vessel.

Monitor in real time from any networked device onboard or any web-enabled device ashore. Historical tracking information is also accessible, both for the host vessel and the surrounding vessels as they come in and out of the reporting radius.

- **Direct connection data storage and tracking unit.**
- **Mount on deck in minutes – connect via one Ethernet cable.**
- **Plug and play.**
- **Always up to date.**
- **Instant permits 24/7.**
- **Independent vessel tracking.**
- **Relative vessel location.**
- **Access vessel location data from any web enabled device.**
- **Use with NovacoPAYS.**
